Reviewer’s report

Title: Trend of various adiposity indices in women with and without history of gestational diabetes: A population-based cohort study

Version: 1 Date: 13 Nov 2018

Reviewer: Giorgio Borretta

Reviewer's report:

This prospective study evaluates, over a decade long follow-up, adiposity indexes trends in a large series of women with or without GDM history.

The study shows that women with GDM history, despite starting higher rates of obesity, in the long term gained better control of their weight and adiposity index than women without GDM.

It is conceivable that this arises from an improved awareness and weight control in GDM women.

As recognised by the Authors, the main limitation of this study is the lack of data about lifestyle modifications, dietary habits and concomitant medications.

Anyway, the paper is clear and well-written, I suggest to accept it in its present form.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

**Quality of written English**
Please indicate the quality of language in the manuscript:

Acceptable

**Declaration of competing interests**
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare I have no competing interests
