Reviewer’s report

Title: Toxicity of insulin-derived amyloidosis: a case report

Version: 0 Date: 09 Apr 2019

Reviewer: Hiraku Kameda

Reviewer's report:

In this paper, the authors describe a case of insulin-derived amyloidosis with surrounding necrotic tissues and its cell toxicity. Although they have already described the clinical course of the cases in "Am J Med. 2014 May;127(5):450-4.", in this paper they showed additional histological and in vitro studies.

This paper is generally well-written and may have a clinical significance, implying the necessity of further investigation for toxic insulin-derived amyloidosis.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
