Thank you for the revision.

The minor points are needed since they are relevant to the history.

1) How was the patient found? Who is the historian? How much of the history was built and work up dictated by the PMH from medical records. This would impact the DDx and how the work up was obtained,

2) Since metabolic encephalopathy is a rather rare DDx item when was it considered?

3) The conclusion in yellow hight should state that rather than a straight conclusion, the diagnosis of metabolic encephalopathy from DKA is the most likely diagnosis.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
