Reviewer’s report

Title: Thyroid primary and metastatic malignant tumours of poor prognosis may mimic subacute thyroiditis - time to change the diagnostic criteria: case reports and a review of the literature

Version: 0  Date: 03 Jul 2019

Reviewer: Pietro Giorgio Calò

Reviewer’s report:

This is an interesting case series on a very unusual clinical situation.

The article is well written.

I believe that in the clinical cases it is necessary to better describe the procedure that led to the diagnosis of subacute thyroiditis and in which structures the diagnosis was made.

I still consider it necessary for the patients undergoing surgery to have some more details on the operation

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
