Reviewer’s report

Title: Severe hypertriglyceridemia in a subject with disturbed life style and poor glycemic control without recurrence of acute pancreatitis: A case report

Version: 0 Date: 25 May 2019

Reviewer: So Nagai

Reviewer's report:

In this manuscript, the authors reported a case of marked hypertriglyceridemia without developing to pancreatitis. It is a very interesting case, however, some points are rewritten for accepting.

1. When acute pancreatitis occurred, the lipid profile was quite different? It is necessary to describe the lipid profile at that time.

2. There is no description about body weight change as well as diet contents precisely.

3. The authors concluded that the causes of severe hypertriglyceridemia are patient's undesirable lifestyle and poor controlled diabetes. However, this case is an extremely high level of hypertriglyceridemia even considering it. What can be considered as a cause is what can be considered in many obese and diabetic patients. There is insufficient discussion to explain the extremely high triglyceride levels in this case.

4. There is no possibility of familial hyperlipidemia in this case? In the manuscript, the authors state no family history of dyslipidemia, but it is necessary to actually confirm the lipid profile of the family. Also, it is possible that minor genetic abnormalities related to lipid metabolism.
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript

Quality of written English
Please indicate the quality of language in the manuscript:
