Reviewer’s report

Title: Severe hypertriglyceridemia in a subject with disturbed life style and poor glycemic control without recurrence of acute pancreatitis: A case report

Version: 2 Date: 09 Aug 2019

Reviewer: Aldo Ferreira-Hermosillo

Reviewer's report:

Discretionary comments

1) The "case presentation" section is confusing. I suggest adding an initial personal history description where the authors describe aspects like the patient used to play SUMOU and then he get used to eat high-calorie diets or that after pancreatitis he stopped the use of alcohol and tobacco. The table 2 could specify that "after 1 month" and "after 1.5 months" means after treatment restart.

2) The authors describe the content of table 1 during the case presentation. This is redundant and this table could be eliminated.

3) Why the patient despite a "better" glycemic control still had ketonemia? This is in relation to ketone levels reported after 1.5 months in Table 2. This was not commented in the discussion section.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
