This is a qualitative review of the barriers and facilitators to weight management in overweight and obese women living in Australia with PCOS. Ten patients were interviewed with a semi-structured interview.

My comment is about data in the table.

How it could be that in all questions there is always one missing response (10%)? Why it was so difficult to obtain the full information from the interviewed patient?
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
