Reviewer's report

Title: Diabetes insipidus and panhypopituitarism as a first presentation of silent adenocarcinoma of lung: a case report and literature review

Version: 0 Date: 04 Jun 2019

Reviewer: Yasir Elhassan

Reviewer's report:

This case reported by Sirinvaravong et al is interesting, but similar cases of pituitary metastasis from occult lung malignancy have been numerously reported.

Some specific criticism:

1- As this is a case report AND literature review, the methods of literature search should be described (key words, platforms searched etc.)

2- The English needs some review prior to publication

3- Line 106: describing "hypogonadotrophic hypogonadism" in a postmenopausal woman is odd as all are "hypogonadal". Maybe say "inappropriately low gonadotrophins".
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
