Reviewer’s report

Title: Participatory Learning and Action to address type 2 diabetes in rural Bangladesh: a qualitative process evaluation

Version: 0 Date: 02 Jul 2019

Reviewer: Antonino Dipino

Reviewer's report:

For the authors:

1) In the Introduction: The authors described the percentage of death by diabetes. However, I think that it also may be useful to show the percentage of prediabetes that is a group more populated than diabetes; please see these reference (PMID: 24442427; PMID: 20628087; PMID: 28973588) and comment these in the Introduction.

1) In the Discussion: The authors found that group interviews and focus group discussions increase the ability to have healthy behaviours. However, the authors don't report data about the adherence of treatment, in particular glucose and lipid lowering treatment and hypertensive therapy that they are essential in diabetic patients; please see these reference (PMID: 29260404; PMID: 28396537; PMID: 31050706) and comment these in the Discussion. Have you data about the treatment adherence?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
