Reviewer's report:

Thank you for your revision. The authors have addressed the majority of the comments provided. However, I have a couple of comments.

I think that could be very useful for the reader of this manuscript to have more information about the results of PLA intervention. I understand that the results of the trials were published elsewhere. However, in order to better evaluate the PLA intervention, quantitative results should be considered together with qualitative results reported in this manuscript in the discussion.
