Reviewer’s report

Title: Association between renal function and bone mineral density in healthy postmenopausal Chinese women

Version: 1 Date: 06 Oct 2019

Reviewer: Mauro Lombardo

Reviewer's report:

In this study the authors have tried to establish possible correlations between renal function and bone mineral density in healthy postmenopausal women. The study is cross-sectional and therefore any findings could only be the result of coincidence. As the authors have pointed out, the data in the literature regarding this possible correlation are very well represented. Studies with a much larger sample size than the paper presented by the authors have shown correlations. The paper is therefore interesting but does not show anything different from what was established in the literature. The authors should highlight the differences with other studies in order to be published.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:
1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
