Title: Profile and Factors Associated with Glycaemic Control of Patients with Type 2 Diabetes in Greece: Results from the Diabetes Registry

Version: 0 Date: 10 Jun 2019

Reviewer: John Doupis

Reviewer's report:

The authors of this manuscript investigated the Profile and Factors Associated with Glycaemic Control of patients with type 2 Diabetes in Greece. They reported that poor glycaemic control was associated with inadequate lipid control, family history of diabetes and presence of obesity, while the use of injectable antidiabetic agents was associated with better glycaemic control.

Although the authors are stating that "This is a multi-center, non-interventional, prospective study" it seems to this reviewer that is more like an observational study. Please correct this term in the manuscript.

"61.5% and 58.9% out of total study sample reported previous diagnosis of dyslipidemia and hypertension, respectively" Did the authors recorded the lipidemic and hypertension status only by patient self-report or did they consider also the anti-hypertensive and hypo-lipidaemic medication and Lab reports. This has to be clarified by the authors.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests
