Reviewer's report

**Title:** Asymmetry and Activity Indices and Occlusal Contacts Distribution in Orthodontically Treated versus Nontreated Young Adults.

**Version:** 3  **Date:** 1 March 2015

**Reviewer:** noshir mehta

**Reviewer's report:**

The title of the paper has the spelling of orthodontics misspelled. The title could be more truncated to make it easier to understand.

Please discuss the reason for the full bite clenching since it showed the left side tooth contact heavier and the right temporalis and masseter. There are articles related to laterally of TMD and other disorders which may speak to the findings of the authors.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**
