Reviewer's report

Title: Assessing changes in quality of life using the Oral Health Impact Profile (OHIP) in patients with different classifications of malocclusion during comprehensive orthodontic treatment

Version: 8 Date: 18 August 2015

Reviewer: Tim T Newton

Reviewer's report:

The authors have addressed the comments made in my earlier review, with one exception - there remains no mention of how the sample size for the study was determined, or a post-hoc analysis of the power of the study.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:

I declare that I have no competing interests.
