Reviewer's report

Title: Impact of Polyols on Oral Microbiome of Estonian Schoolchildren

Version: 0 Date: 28 May 2018

Reviewer: Gulnur Emingil

Reviewer's report:

This is an interesting and comprehensive long term study investigating the effects of polyols on oral microbiome. Although the aim is to reveal their effect in terms of caries experiences, most of the pathogens are involved in the pathogenesis of periodontal disease. There is no information about periodontal status. Therefore, it would be complementary to add a short limitation paragraph about this issue.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
