Reviewer’s report

Title: Deviations in palatal region between indirect and direct digital models: An in vivo study

Version: 0 Date: 23 Dec 2018

Reviewer: Emmanuel NICOLAS

Reviewer's report:

This study is particularly interesting and well conducted. Both the methodology and the analysis are appropriate. However, I would suggest to the author to nuance /open their discussion to the fact that only one type of IOS (Trios 3shape) was used, and that image capture could vary according to the type of IOS. For the future, an inter camera comparison using the same evaluation technique could be interesting to look at.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
