Reviewer’s report

Title: Case report Peripheral Adenomatoid Odontogenic Tumor in a Cloak of an Epulis: Report of a rare case

Version: 0 Date: 17 Jan 2019

Reviewer: Sajna Ashraf

Reviewer's report:

It is a well written manuscript. I do appreciate the efforts to include similar case reports along with this manuscript.

The following are my suggestions:

1) Include the possible outcomes of this tumor if the excision is not done or if it is not identified and managed appropriately.

2) In line 134, the term "fibrous epulide" is inappropriate as it is a single lesion and "epulide" is a plural term.

3) Please explain why the term "Hybrid variant" has been used in this case when the radiograph clearly demonstrates "a minor arc shaped bone loss".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
