Reviewer’s report

Title: An evaluation of superhydrophilic surfaces of dental implants - a systematic review and meta-analysis.

Version: 2 Date: 17 Dec 2018

Reviewer: Reviewer 2

Reviewer's report:

REVISION ASSESSMENT FROM THE ACADEMIC PEER REVIEWER:

Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution?

Yes

Reviewer comments: Authors have now substantially improved the manuscript.

Still the conclusion is not complete.

In the objective section the authors mention about COMPARISON of survival rates, marginal bone loss as well as assess the degree of stability of Straumann SLAactive® and Thomenn Incell® implants.

SO it will be better if the authors state that comparatively which implant system out of the two was better as compared to the other.

Further The authors have mentioned in the text that the articles were removed depending upon their suitability and at the end after full text reading, only 20 articles were considered. Please write it in sentence format if you want to add in text.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
