Title: Dentists’ Attitudes Towards Chairside Medical Conditions Screening in a Dental Setting in Saudi Arabia: An Exploratory Cross-Sectional Study

Version: 0 Date: 09 Jan 2019

Reviewer: Arheiam Arheiam

Reviewer's report:

This paper investigated attitudes and barrier to medical screening among a group of dentists in Saudi Arabia.

Although authors indicated that the study is a pilot survey for a feasibility reasons, this was not addressed in the discussion!!?. In fact the study is a small survey among a convenience sample. Therefore, the authors should amend the title and acknowledge the limitations of such small sample size and a non-representative sample a, and tell us why they did not conduct a wider survey.

The manuscript still needs proof reading and references to be added in places ( for example: Line 15: (The current data for SA is alarming,….).
