Reviewer’s report

Title: Craniofacial fibrous dysplasia associated with McCune-Albright syndrome: Challenges in diagnosis and treatment: Case reports

Version: 0 Date: 24 Jan 2019

Reviewer: Maria Francesca Messina

Reviewer's report:

The case report is very interesting and it is supported by very educational images that demonstrate a very advanced surgical technique.

Minor revision

1) References are not inserted properly in the Introduction and the Discussion

2) In the discussion (pag. 10, lines 7-10) the following references should be inserted:

a) Combined treatment with ketoconazole and cyproterone acetate in a boy with McCune-Albright syndrome and peripheral precocious puberty.

b) Regulation of spermatogenesis in McCune-Albright syndrome: lessons from a 15-year follow-up.

c) McCune-Albright syndrome in a boy may present with a monolateral macroorchidism as an early and isolated clinical manifestation.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
