Reviewer's report:

The article falls within the scope of the journal. The manuscript is well written and all the sections are explained clearly. However, following queries may be answered prior to acceptance:

1. The authors have described the methodology wrt to the preparation of the SRF-CPC. However, the authors have not supported with any evidence about the successful incorporation of CPC with the polymer like microscopic analysis.

2. Also if the final SRF-CPC prepared contained 0.5% CPC.

3. The study does not emphasize or show that with mere irrigating solution (as mentioned in the discussion) all of the filler can be washed away and if remained might cause toxicity.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
