Reviewer’s report

Title: Infantile Hepatic Hemangiomas associated with high-output cardiac failure and pulmonary hypertension ------a case report and review of the literature

Version: 0 Date: 25 Jun 2019

Reviewer: Rodrigo Nunes Rached

Reviewer's report:

The manuscript brings an interesting topic for readers, specially clinicians and researchers interested in a better management of adhesive restorations of NCCL.

A PDF file was attached with comments to the authors. It is important to address each one.

Special attention should be given to literature presented. Newer references should be added and discussed.

Sincerely yours,

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
