Reviewer’s report

Title: Factors influencing incidents of complications while using Nickel-Titanium rotary instruments for root canal treatment; a questionnaire study

Version: 1 Date: 07 Jul 2019

Reviewer: Giovanni Veronesi

Reviewer's report:

The author has responded to all my previous concerns. However, with reference to my point #4, I suggest deleting the added sentences "The main null hypothesis were: 1... 2....". The modified version of the previous sentence ("the aim of the questionnaire...influencing factors") clarifies the study aims.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
