Title: Topical povidone iodine inhibits bacterial growth in the oral cavity of patients on mechanical ventilation: a randomized controlled study

Version: 1 Date: 26 Jan 2020

Reviewer: Dieni Teixeira

Reviewer's report:

The authors have satisfactorily responded to all my questions and made the necessary changes to the manuscript. However, some additional changes need to be made.

methods

The sentence 'the data were analyzed by means of descriptive statistics and inferential statistics' should be moved to the statistical analyzes section.

The authors must choose the table or chart. If the option is for the table, pay attention to using median and interquartile range or mean and standard deviation. In my opinion, the most correct thing would be to express the median values because a non-parametric test was applied. The table is clear and facilitates understanding. If the option is the chart, add the p values, if possible.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
