Reviewer's report:

Major Compulsory Revisions: none

Minor Essential Revisions:
The abstract is not completely clear about the fact that this paper concerns a research protocol, and that this protocol only concerns the first 3 phases of the MRC Framework (phase 0, 1 and 2)
The paper is well written, but there are some spelling mistakes: e.g. the word 'interventiosn' (line 114) or "interventons" (line 158)
Please check the completeness of the references at the end of the paper (for instance in the first reference of De Roo et al. the last co-author A.L. Francke is missing). Furthermore, the reference style is not always consequent

Discretionary Revisions: none

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
