Reviewer’s report

Title: 'Worried to Death': The assessment and management of anxiety in patients with advanced life-limiting disease, a national survey of palliative medicine physicians

Version: 0 Date: 04 Apr 2017

Reviewer: Gregory Crawford

Reviewer’s report:

This is an interesting piece of research and is well presented.

I appreciated the provision of a list of abbreviations at the end of the text but believe that SSAS was used without explanation and is an abbreviation that I do not know. I also think that all the abbreviations that are used in Table 2 should have been included in the list of abbreviations that was provided at the bottom of this table (i.e. DT, ESAS, and HADS)

The flow and argument of this paper is well constructed. I would have liked to have been provided with the number of palliative medicine physicians and trainees that RACP census listed to then be able to assess how representative members of APM are of the workforce.

The references are appropriate and contemporary and only Reference 22 appeared to have some inconsistencies with capitalisation.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
