Reviewer's report

Title: Negative Pain Management Index scores do not necessarily indicate inadequate pain management: a cross-sectional study

Version: 0  Date: 08 Dec 2017

Reviewer: Carlo DeAngelis

Reviewer's report:
This is a valuable addition to the discussion surrounding the use PMI as a measure of adequate pain control. The study was well planned and executed. Results clearly presented and conclusions are supported by the data. I do not have any suggestions for changes/additions

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
I am able to assess the statistics
