Reviewer's report

Title: Enabling activity in palliative care: focus groups among occupational therapists

Version: 2  Date: 31 Oct 2018

Reviewer: Deidre Morgan

Reviewer's report:

Thank you for the revised version of your paper. Some sections read well but others are harder to understand. I suspect this is a translation issue, separate to the study quality. A number of my earlier queries were not addressed and still stand. While I think these are related more to English translation than anything else, they do affect the readability of the paper.

Quotes should support the themes and 2 quotes in the "Prioritising activities together with the client" do not clearly relate to the theme title. Comments in text. The phrase occupational therapist(s) is used frequently throughout the text. Use of the phrase "participants" could also be used to break this up.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
