Reviewer’s report

Title: Factor Structure of the Quality of Children's Palliative Care Instrument when Completed by Parents of Children with Cancer

Version: 0 Date: 02 Dec 2018

Reviewer: Julia Downing

Reviewer's report:

This is an interesting study and an important one as we need to be able to measure the quality of children's palliative care throughout the disease spectrum. It is a well written paper but would benefit from defining the population in the title i.e. with parents of children with cancer - so that it is clear from the outset the population within which the tool is being tested.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
