I think the changes help the paper. I still think the presentation of the results is quite heavy in the discussion but this is helped by the addition of references. Some minor points:

1. You have a line in the introduction which says 'Other surveys had similar findings' - could you provide the references your ref (Background page 3, paragraph 3, lines 3-5)

2. A line doesn't make sense 'included unadvertised within an 'expert patient' chronic disease management education programme' - could you rephrase?
