Reviewer’s report

Title: Recommendations on priorities for integrated palliative care: transparent expert consultation with international leaders for the InSuP-C project

Version: 0 Date: 11 Dec 2018

Reviewer: Marilène Filbet

Reviewer’s report:

This article describe the recommendations on priorities for integrated palliative care, following an expert meeting. The aims is to establish valid international recommendations from the InSup-C project.

This article is interesting but raise some comments:

-1- if the goal of the study is to establish valid recommendations the methodology seems should have been stronger as a Delphi methodology, for validated results

-2- if the goal of the study is to establish international recommendations the expert panel is mostly european and limit the results generalization

-3- there is few clinicians in the panel

-4- the table 2 are not easy to read and confusing about the ranking. I would suggest to present the results from the first to the last recommendations

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
