Reviewer’s report

Title: Role of nurses in medication management at the end of life: a qualitative interview study

Version: 0 Date: 03 Feb 2020

Reviewer: Carole Parsons

Reviewer's report:

This is an interesting study in an area which is gaining in research interest. The methods are appropriate and well defined, and the results are clearly discussed in the context of the literature in the area. The authors have reported the study according to the COREQ reporting guidelines for qualitative studies. In my view, this paper is acceptable for publication. However, I would urge the authors to consider changing the sentence in the Background from "The shortcomings on the physicians' side" to something more moderate and less contentious/inflammatory.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
