Reviewer's report

Title: Men's knowledge and attitudes about cervical cancer screening in Kenya

Version: 2  Date: 8 September 2014

Reviewer: Camille Ragin

Reviewer's report:

No Major compulsory revisions noted. This is an interesting study investigating a very important topic. the novelty in itself is the design of the study i.e. the assessment of male knowledge and attitudes towards cervical cancer screening. The results are clear.

Minor revisions: it is not necessary to present the % for each row if the column header already indicates that the presented numbers are percents.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
