Reviewer's report

Title: Correlates of depressive symptoms in late middle-aged Taiwanese women: Findings from the 2009 Taiwan National Health Interview Survey

Version: 2 Date: 05 Dec 2016

Reviewer: Thomas von Lengerke

Reviewer's report:

Revised as suggested. The only discretionary thing is that according to international standards by the World Health Organization, the BMI-category between 25 and 29.9 is termed "preobese" (or, as noun: "preobesity"; see Table 2.1. in http://www.who.int/nutrition/publications/obesity/WHO_TRS_894/en/ or the information on http://www.euro.who.int/en/health-topics/disease-prevention/nutrition/a-healthy-lifestyle/body-mass-index-bmi). This could be changed in the paper, e.g. Table 1).

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
