Reviewer’s report

Title: Individual-level and Community-level Determinants of Cervical Cancer Screening among Kenyan Women: A Multilevel Analysis of a Nationwide Survey

Version: 1 Date: 11 Jul 2017

Reviewer: Paolo Giorgi Rossi

Reviewer's report:

The paper has been improved and all the main comments have been addressed.

I suggest to improve the references of the introduction: for HPV testing efficacy in low resource countries the only study that really gave a clear answer is Sankaranarayanan 2009 NEJM. also for self sampling there are other studies that better summarize the issue in LMIC (as Lazcano-ponce lancet oncology 2010) and for the accuracy (Arbyn Lancet oncol systematic review).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
