Reviewer’s report

Title: Effectiveness of message framing on women's intention to perform cytomegalovirus prevention behaviors: A cross-sectional study

Version: 0 Date: 23 Apr 2017

Reviewer: Yasuhiko Ebina

Reviewer's report:

The authors evaluated the effect of message framing on women's intention to perform cytomegalovirus (CMV) prevention behaviors involving handwashing, not sharing food and eating utensils, not kissing a child on the lips and not placing a pacifier in the mouth after it was in a child's mouth.

The methods of the study is too complicated. It is very difficult to understand the results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

Not relevant to this manuscript
