Reviewer’s report

Title: Real-world experience of women using extended-cycle vs monthly-cycle combined oral contraception in the United States: the National Health and Wellness Survey

Version: 0 Date: 25 Sep 2017

Reviewer: Santiago Palacios

Reviewer’s report:

It is very interesting, well developed and with clear conclusions.

My comments are:

- I do not understand why the Hispanic female population is so low in the study, when in the United States alone, the Hispanic population is 11.7% of the entire population.
- The clear criticism of the study is that it compares a population of 260 versus 3,616, as they point out.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
