Reviewer’s report

Title: What Women Say about their Dysmenorrhea: A Qualitative Thematic Analysis

Version: 0 Date: 19 Apr 2017

Reviewer: Kenji Watanabe

Reviewer's report:

This article describes the diversity of the symptoms, accompanied symptoms, therapy effectiveness, and so on. Even though the facts are true, method and result are too vague to add new findings. Conclusion of this article is easily assumed. Authors should have chosen a right method to show new evidences. Because the method is not strong enough, the result is too vague.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
