Title: Factors Associated with Occupation Changes after Pregnancy/Delivery: Result from Japan Environment & Children's Pilot Study

Version: 1 Date: 07 Nov 2017

Reviewer: Lisa Russell

Reviewer's report:

I am pleased that the authors have indeed taken on board most of the comments/edits suggested in the previous review. The nature of the work is much clearer and more recent data has now been referred to as requested. This has in turn strengthened the abstract, methods and conclusions sections. The key words now include 'occupation' and 'employment'.

One minor detail - I feel the methods could still be sharper, you could for example better define the type of questionnaire rather than just describing it as 'standard'.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls? 
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown? 
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review? 
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
