Reviewer’s report

Title: Analysis of uterine corporeal mesenchymal tumors occurring after menopause

Version: 0 Date: 29 Nov 2018

Reviewer: Santiago Palacios

Reviewer’s report:

Interesting retrospective work, which helps to know the problem of uterine sarcomas in the pre and post menopause.

In Material and Methods: why, if we are in 2018, has the patient review been done until 2014?

I would like to better specify (including including a table) the reasons for surgery in postmenopausal women.

Table I shows "Clinical findings" but does not cover 100% of patients.

In Table III, the comparison of the results of the MRI has not been made.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
