Reviewer’s report

Title: Health care informational challenges for women diagnosed with cervical intraepithelial neoplasia: A qualitative study

Version: 0 Date: 29 Jun 2019

Reviewer: Yingchun Zeng

Reviewer's report:

Thanks for offering this opportunity to review this manuscript, titled as "It might be cancer... All those things they don't tell you": Health care challenges for women diagnosed with Cervical Intraepithelial Neoplasia."

My comments listed as below:

The title of this study can be revised as "Health care challenges for women diagnosed with Cervical Intraepithelial Neoplasia: A qualitative study.", which can be directly show the study design.

In introduction section, please authors elaborate more information about the rational of conducting this study?

In discussion section, please authors added what's new of this study uniquely found? As two themes identified from this study were also reported by internationally, previous published research in terms of women with CIN lack knowledge about their condition, which limits their self-care results in negative psychological effects, and lack enough information between health care providers and patients.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess
Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
