I think you should shorten your paper a little. In contrast to the introduction of the paper that is a field where a lot of publications already appeared in European Journals or books. The work of e.g. Georgetown University, Washington, Victoria Jennings or in Europe Roetzer/ Vienna, Doering/ Munich, Marshall/ UK, Billings/ Australia, Klann, Frank-Herrmann, AG NFP/ Koeln should be mention. The TBP is only one way to get informations on this problem. Therefore shorten the Introduction of the paper and also the description of the methods.

Please make the literature research more worldwide and not only in the context of US.

The material researched includes only 600 women altogether, which is a very small basis for such a basic question.

In the discussion the worldwide knowledge in this field should be included.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
