Title: Refugee women’s experience of the resettlement process: a qualitative study

Version: 0 Date: 08 Sep 2019

Reviewer: Karar Ahsan

Reviewer's report:

I thanks the authors for preparing this manuscript, which sheds light on an important but understudied topic like refugee and migrant health.

Specific comments:

1. p.2, line 9: Authors may consider revising the methods statement to make it more specific (for example, "Qualitative study with 11 refugee women recently arrived to Sweden and received their residence permit").

2. In regard to refugee women's healthcare seeking, how the findings of this study relates to the authors’ earlier paper (DOI 10.1186/s13104-018-3728-4) and other recent studies (e.g., Svensson, Carlzén & Agardh [2017]; Pangas et al [2019])? I would encourage the authors to elaborate this (p.12, lines 12-17) finding, which would be a useful addition to the manuscript.

3. References #13 and 18 needs to be corrected following the journal's formatting guidelines.
