I have seen that in this study most of the participants were Caucasians. Do literature data exist about pubic hair removal in non-Caucasian women?

Title. "Au": please specify.

Introduction: "Investigations...": it is necessary to underline that pubic hair removal is associated with frequent and important skin infections, in particular molluscum contagiosum (please read Veraldi S: Int J STD AIDS 2016, 27, 699).

The manuscript is pointlessly long.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
