Reviewer’s report

Title: Physiotherapists' and midwives' views of increased inter recti abdominis distance and its management in women after childbirth

Version: 0 Date: 03 Oct 2019

Reviewer: Abdullah Al Ibrahim

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Thank you for giving me the opportunity to review this article.

The research handle a very interesting, yet untouched subject before.

The only comment I could add, is to highlight the importance of addressing this issue from patients point of view; i.e, is it real concern to them, how bad the feels if any?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
