Reviewer’s report

Title: (5R)-5-hydroxytriptolide Inhibits Osteoclastogenesis through RANKL/RANK/OPG Signaling Pathway

Version: 3 Date: 31 December 2014

Reviewer: Toru Yago

Reviewer’s report:

To the authors

I received the revised manuscript from authors. I think that authors revised their paper carefully; however, I am afraid that I can hardly detect osteoclasts in Figure 5. This figure is essential for evaluating the author’s work. We cannot call the stained cells in Figure 5 as “osteoclasts”.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
