Reviewer’s report

Title: Time and Dose-Dependent Effects of Labisia pumila on the Bone Strength of Postmenopausal Osteoporosis Rat Model

Version: 1 Date: 22 June 2014

Reviewer: yang YZL11950@126.com

Reviewer’s report:

Major Compulsory Revisions
1. Why chose the two doses at 20 and 100 mg/kg? I think at least three doses responses for conventional pharmacological experiments have to be included.
2. Please add the HPLC fingerprint of the LP extract.
3. Please add the assay method of the Yang modulus.
4. The Discussion is well written and pertinent, but could be shortened.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
