Reviewer's report

Title: Synergistic effects of acyclovir and 3, 19-isopropylideneandrographolide on herpes simplex virus wild types and drug-resistant strains

Version: 3 Date: 27 January 2015

Reviewer: Laura B Talarico

Reviewer's report:

The revised manuscript by Priengprom et al. has been improved considerably.

Minor essential revisions:

-Line 208-211, the authors should show in Table 2 or in the text the IC50 values for the combination of compounds, ACV and IPAD.
-Line 172, there are typing mistakes in the sentence.
-Line The authors should mention in the text that they performed virus binding and internalization assays separately and that they observed no significant effect in these steps of the virus multiplication cycle.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:

I declare that I have no competing interests.
