Title: Sasang Constitution Affects the Incidence of Functional Dyspepsia

Version: 2  Date: 2 April 2015

Reviewer: Junhee Lee

Reviewer's report:

Major Compulsory Revisions

This manuscript presented the incidences of functional dyspepsia according to sex and Sasang constitutions. The incidence of a disease is defined as the number of new cases of a disease that occur during a specified period of time in a population at risk for developing the disease.

But, in this manuscript, there were no descriptions about the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up. And there was no diagram of the enrollment of participants.

So, I think the values suggested in this manuscript cannot be said as incidence.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
