Reviewer's report

Title: Antinociceptive, muscle relaxant and sedative activities of gold nanoparticles generated by methanol extract of Euphorbia milii

Version: 2 Date: 19 October 2014

Reviewer: SHAHID H ANSARI

Reviewer's report:

In said research paper methanolic extract of the plant was used. In my opinion ethanol or hydro alcoholic extract should have been used because methanolic extract may cause toxicity. In addition to this gold nano particles were used which itself may show severe toxicity. Authors should be asked to explain the same.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
